Feedback for RRMP Research Proposal Summative

Tutor completing summative feedback: Karen Outram	**Student number:** 415963
Details of any extensions etc:	**Submission Attempt:** First submission Second submission

Criteria and weighting	**Level**	**Comments:**
Knowledge and Understanding weighted 25%, Are the major points identified? Are the details presented clearly?	**Outstanding**	There is some outstanding knowledge discussed as part of your topic in the summative. The presentation is focused and moves from one well researched fact to another, drawing through debate through the whole of the content, by looking at both sides of the argument. Continue this approach moving forward for future summative.
Criticality weighted at 25%, Is there a critical discussion/analysis of your methodology/design?	**Outstanding**	Outstanding level of criticality drawn through all aspects of the discussion with strengths and limitations reflected from a theoretical perspective, applied through real world applicability.
Structure and Presentation weighted at 10%: Is the presentation well organised?	**Outstanding**	The presentation does move from one well defined fact to another, and has a 'golden thread' of discussion running all the way through the content. The presentation scaffolds seamlessly from one point to another and builds and develops the key points of the content fluidly.
Presentation and Communication Skills weighted at 30%: Is the presentation clearly introduced and concluded? Is the presentation well-paced	**Satisfactory**	Whilst the presentation was very thorough, the content went on for circa 21minutes and 30+seconds. The presentation should have been capped at 15minutes. For future summative please ensure that you reflect what the

and timed? Is the information presented clearly and concisely? Is the presentation style lively, fluent and engaging?		summative time lines are, [I discussed this in my live sessions and 15 minutes is discussed in your online student materials]. You spoke clearly, but the oral presentation could have been speeded up slightly with no detriment, to include all your content within the required time line. Please consider this for future summative. The presentation itself had visual consistency but you could have broken up the block colour with text boxes for example to give the visual dimension of the presentation a little more interest. This is particularly important for audience engagement, if for example you are lingering on one slide for longer.
Use of relevant sources weighted at 5%: Are the major points identified? Are the details presented clearly?	**Outstanding**	Outstanding use of research resources. The content is very thorough and relevant.
Use of relevant sources weighted at 5%: Is there a critical discussion/analysis of your methodology/design?	**Outstanding**	Outstanding critical discussion with the pros and cons of research selected, thoroughly analysed and developed through the course of the discussion
Overall		
Positives: • Mostly outstanding outcomes • With satisfactory presentation and communication skills • Thorough research and discussion		
Points for development: • For future look at the required time guides for presentations • Consider small details like this for future summative • Consider the visual aspect of the presentation more, and avoid lingering for a long period of time on one slide whilst you speak. Introduce more slides if necessary to keep visual attention connected to the power point for the viewer, as you discuss your concepts
